

PRODUCT DESCRIPTION

Profile designed to eliminate the need to cut the cover due to end caps.

- Wide range of accessories
- Low height
- Smooth profile surfaces
- Small bending radius

FINISH :

Silver anodized

RAL

*Custom colors available upon request

TECHNICAL SPECIFICATION

Application

- furniture and decorative lighting.

Mounting

- to the surface, suspended or recessed, using dedicated accessories, properly selected screws, double-sided adhesive tape or mounting adhesive,
- the cover is cut to the length of the profile,
- easy assembly and disassembly by snapping in and out.

Additional information

- possibility of building a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof,
- IP67 is possible with the following covers: LIGER, KA, HS, KA-PRO and KA-COM,
- can be equipped with transparent and frosted covers (diffusers), aluminum-colored plastic end caps, metallized end caps and electricity conductive end caps,
- space for LED strip: 11.2 mm.

Profile bending

Minimum radius for a bent lighting fixture directing light inwards	Minimum radius for a bent lighting fixture directing light outwards
--	---

150 mm	150 mm
--------	--------

- minimum radius - bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile,
- internal radius - refers to the profile bent so that the cover is facing the inside of the arch,
- external radius - refers to the profile bent so that the cover is facing the outside of the arch,
- irregular curves are possible after consultation and individual quotation,
- when bending anodized profiles, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius).
